

Results Contests

In this academic year 2012-2013 the school administered 14 contests, organized by Canadian Mathematical Society, Mathematical Association of America, and Centre for Education in Mathematics and Computing, Waterloo. In addition, the school proposed a new contest, SCM Math Contest, for students in grade 7-8. In all, 279 students have participated in these contests. Our Center will organize again, every year, these contests.
